

JetPower480-1000 VARIO

High Pressure Pump Unit

The perfect multi-flexible diesel unit for the professional application.

The JetPower480-1000 VARIO works efficiently, fast and reliably in the professional applications for the rehabilitation and industrial cleaning tasks. The power variable unit is suitable for use with hand-held tools, large vessel cleaning and cleaning robots.

Technical Features

- 480 kW-Class
- Simplest, extremely comfortable and user friendly operation.
- Extremely energy efficient operation through automatic performance control for nearly all consumer types.

Available Emission Stages

EU stage V
EU stage 3A*
EPA TIER IV FINAL

High Pressure Technology

VARIO-Performance

Our multi-flexible solution for your jobs

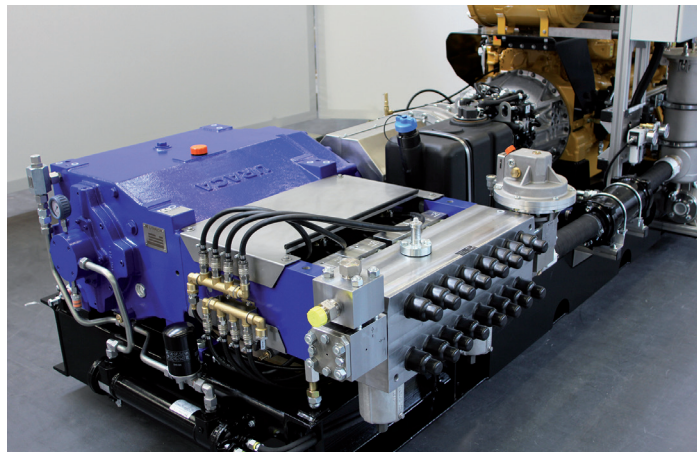

Properties

- Maximum flexibility and minimum fuel consumption through automatic performance adjustment.
- Fuel savings and emission reduction is achieved through highly efficient components. The diesel emission stages EU stage V, EU stage 3A* and EPA TIER IV FINAL are thus achieved.
- The unit is suitable of installation on a truck or in a container.

URACA JetPower Control

- Easiest, extremely comfortable and user friendly through intuitive control.
- Efficient operation through simple pre-selection of the operating pressure and automatic performance adjustment.
- Intuitive operable unit control with color display.
- All important data displayed in a sign screen.

Technical Data	JetPower480-1000 VARIO
Pump Type	P4-70
Hydraulic Power Rating	425 kW
Variable Flow Rate	16 - 238 l/min at 1,000 bar
Diesel Power Rating	470 kW EU stage V EU stage 3A* EPA TIER IV FINAL
Gear Ratio	Automatic transmission, can shift under power
Water Tank Capacity	≥ 1,000 l
Diesel Tank Capacity	900 l
Dimensions	4,706 x 1,840 x 2,475 mm
Weight	ca. 5,800 kg

* According to regional regulations.
